Working Papers

Du, Z., & **Liu, X.(corresponding author)** (2026). "Signal Transmission" or "Tone Manipulation"? Managerial Excessive Tone and Investment Efficiency in China. SSRN Working Paper.

Research Experience

University of Chinese Academy of Sciences

2025 – Present

Coauthor and Lead Researcher

Beijing, China

- Developed an empirical study of whether managerial excessive tone serves as credible information transmission rather than impression management, using Chinese A-share listed firms and MDA textual data from annual reports.
- Led the research process, including literature review, variable construction, data cleaning and merging, model specification, mechanism and heterogeneity analyses, robustness tests, and manuscript drafting; the completed working paper is available on SSRN.

University of Science and Technology of China

Dec. 2025 – Jun. 2026

Research Assistant to Prof. Jiaquan Yao

Hefei, China

- Led the end-to-end development of a policy research project on Anhui province's science and technology finance model and independently authored the full research report.
- Designed an analytical framework covering five financing channels—venture capital, bank credit, innovation bonds, technology insurance, and equity markets—and benchmarked Hefei against Shenzhen, Hangzhou, and Ningbo.
- Synthesized policy documents, market indicators, and city-level case evidence to formulate recommendations on long-term capital, direct financing, professional financial services, and digital financing platforms.

Qufu Normal University

Jan. 2022 – Mar. 2023

Research Assistant and Coauthor, Digital Finance and Fintech Project

Shandong, China

- Collected, recoded, deduplicated, and merged bibliographic records from Web of Science and Scopus, constructing a final dataset of 1,191 publications on digital finance and fintech.
- Conducted bibliometric and content analyses using VOSviewer, including citation, co-citation, collaboration-network, keyword co-occurrence, and thematic-evolution analyses.
- Produced the main visualizations and contributed substantially to the original manuscript and revisions, resulting in a coauthored article published in *Technology in Society*.

Academic Writing and Textbook Development

Digital Economics, 2nd ed. | *Contributing Writer, China Machine Press* **2023 – Present**

- Drafted and substantially revised more than half of the manuscript, with formal acknowledgment of the contribution planned in the book’s preface.
- Systematically reviewed foundational literature spanning information economics, the knowledge economy, and digital economics, and organized the material into a coherent textbook framework.
- Adapted canonical models of digital goods, price discrimination, e-commerce, the sharing economy, network effects, platform pricing, and platform monopoly into simplified derivations and accessible economic explanations for classroom use.

Introduction to the Digital Economy | *Contributing Writer, Peking University Press* **2025 – Present**

- Authored a four-chapter thematic module tracing the evolution of digital products and business models from the second half of the twentieth century to the present.
- Examined representative business models in e-commerce, the sharing economy, and platform markets, and translated their underlying economic mechanisms into structured, textbook-style exposition for undergraduate readers.

Honors and Awards

- Graduate Academic Scholarship, University of Chinese Academy of Sciences, 2024–2026.
- First-Class Academic Scholarship, Qufu Normal University, 2022.
- National First Prize, National English Competition for College Students, 2022.

Technical Skills

Software: Stata, Python, MATLAB, LaTeX, VOSviewer.
Methods: Panel-data analysis, regression modeling, data cleaning and merging, text-data processing, bibliometric analysis, and data visualization.
Databases: CSMAR, CEIC, Orbis, World Development Indicators, Web of Science, and Scopus.
